ABOUT ME

Senior Product Designer and UX Leader with over 10+ years of experience designing enterprise-scale SaaS platforms, AI-powered applications, and data-intensive B2B ecosystems. Proven track record in driving product quality, scaling design systems, and delivering measurable business outcomes. Expert in leading AI-enabled product innovation and aligning cross-functional teams around customer-centric strategies.

WORK EXPERIENCE

- Nov 2021 - Present

Lead Product Designer - AI & Enterprise SAAS
Accenture | Gurgaon
 - Directed end-to-end product design lifecycle for FinTech, Healthcare, Insurance and Enterprise SaaS products.
 - Established enterprise design systems adopted across multiple product teams to ensure visual and functional consistency.
 - Integrated AI powered workflows into enterprise products, reducing fragmented decision making.
 - Led accessibility initiatives to implement WAG 2.1 standards to ensure inclusive user experiences.
 - Mentored junior and mid-level designers on UX best practices, improving team output quality.
 - Improved feature delivery speed by 30% and accelerated design-to-development handoff by 35%.
- Mar 2021 - Nov 2021

UI/UX & Product Designer - AI Analytics Platform
Cavision Astar Solutions | Noida
 - Redesigned analytics dashboards for enterprise decision-makers, simplifying complex data visualization.
 - Designed intelligent alerting systems and predictive insight interfaces to enhance data-driven decision making.
 - Conducted user interviews and usability testing to validate design decisions and improve product market fit.
 - Reduced task-completion time by 40% and improved dashboard usability by 35%.
 - Increased executive adoption of analytics tools by 30% through improved interface clarity.
- Aug 2019 - Mar 2021

UI/UX Designer - E-Commerce Platform
Vaibhav Global Limited | Jaipur
 - Led the design of e-commerce customer journeys, focusing on checkout experience optimization.
 - Optimized mobile shopping flows through behavioral analysis and funnel visualization.
 - Increased conversion rates by 18% and reduced checkout abandonment by 22%.
 - Improved mobile engagement by 28% through iterative design improvements.
- April 2016 - Aug 2019

UI/UX Designer
Interglobe Technology Pvt Ltd | Gurgaon
 - Designed logistics and travel management platforms using reusable design component systems.
 - Improved information architecture, reducing navigation complexity by 40%.
 - Increased user efficiency by 25% and accelerated feature delivery by 20%.
- Sep 2014 - Jul 2015

Graphic & Web Designer
Concentrix Daksh | Gurgaon
 - Designed and developed responsive websites and digital assets to enhance brand visibility.
 - Created marketing creatives, social media campaigns, and email templates while maintaining strict visual consistency.

NOTABLE ACHIEVEMENTS

- Built AI-powered UX Design Agents that automated research synthesis, UX documentation, heuristic evaluations, accessibility validation, and design reviews, reducing manual effort by 50% and enabling faster, more consistent design delivery.
- Led AI transformation across the UX organization by integrating Generative AI and Agentic AI into design workflows, improving team productivity by 40% and accelerating product delivery across enterprise SaaS platforms.
- Partnered with Product Managers, Engineering, and AI teams to define AI-powered user experiences, establish AI design standards, and deliver scalable, human-centered enterprise products that improved decision-making and overall user satisfaction.

PROJECTS

- Enterprise PLM System**
Lead Designer
Managed product portfolio and new product introduction workflows for cross-functional teams.

AI Decision Intelligence Platform
Lead Designer
Developed predictive analytics dashboards with smart alerts and AI-driven recommendations.

Claims Management System
Lead Designer
AI-powered platform that streamlines insurance claim processing, investigation, approval, and settlement through intelligent workflow automation.

ERP Modernization Program
Lead Designer
Modernized legacy ERP systems into scalable, user-centric enterprise platforms to improve operational efficiency and business productivity.

Visual Design QA / UAT Platform
Lead Designer
Built an AI-powered Visual Design QA/UAT platform that automatically compares Figma designs with live applications to detect UI inconsistencies, accessibility issues, and design deviations before release.
- ## ACCOMPLISHMENTS
- Certifications**
 - IBM Enterprise Design Thinking Practitioner - IBM
 - Google UX Design Professional Certificate - Google
 - Google Generative AI Advanced - Google
 - AI for UX Design - Industry
 - Stanford UI/UX Design for AI Products - Stanford
 - IxDF AI for Designers - IxDF
